Job Description

Cerner Overview

Cerner is contributing to the systemic change of health and care delivery. We started by digitizing paper processes and now offer a comprehensive array of information software, professional services, medical device integration, remote hosting and employer health and wellness services. Cerner systems are used by everyone from individual consumers, to single-doctor practices, hospitals, employers and entire countries. Taking what we’ve learned over more than three decades, Cerner is building on knowledge in the system to support evidence-based decisions, prevent medical errors and empower patients in their care.

Cerner solutions are licensed by approximately 9,300 facilities around the world, including hospitals, physician practices, home health facilities, employer sites, retail pharmacies and ambulatory facilities such as labs, cardiac care, radiology and surgery centers.

Group Overview

Cerner Extended Care offers technology solutions for the medical team providing patient care after a patient’s hospital stay has ended. Partnering with long-term care facilities, home health providers and hospice agencies, Cerner Extended Care helps ensure the patient’s long-term medical team has access to all information necessary to continue quality health care delivery.

Responsibilities

As an Operational Support Intern, you have the opportunity to work on challenging, professional projects with rapidly-growing Cerner teams. You will work with your team to understand various aspects of health care delivery and identify ways Cerner technology can improve that delivery model.

Working alongside Cerner professionals, you can expect to grow your professional skills, experiencing first-hand professional communication, time management and team collaboration. You can also expect to gain direct experience in two of the fastest-growing industries in the United States—health care and information technology.

Qualifications

Minimum Qualifications:

- Minimum 3.0 cumulative GPA
- Enrolled in a Bachelor’s degree program from an accredited institution
- US Work Authorization required
- Ability to work in a self-guided, self-paced environment with strong attention to detail

This opportunity is open to students interested in a career in health care, business or information technology.

Additional Information

Cerner Corporation is proud to be an Equal Opportunity Employer and a drug-free workplace.

Applicants for U.S. based positions with Cerner Corporation must be legally authorized to work in the United States. Verification of employment eligibility will be required at the time of hire. Visa sponsorship is not available for this position.
