

Connecting to MU-Resident Wifi

1. Navigate to the Resident Wifi portal via the QR Code below:

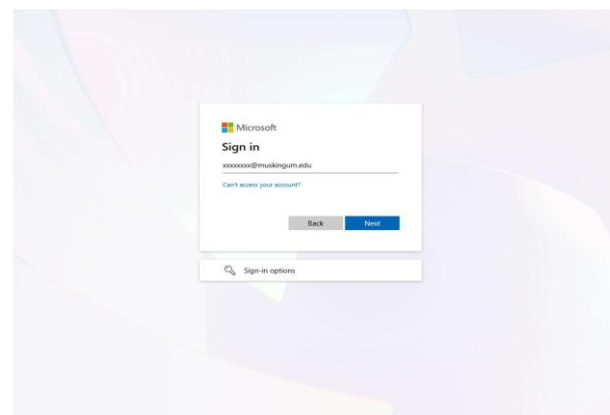

Or use this link:

<https://tinyurl.com/bdjxzuun>

2. Once on the portal, click the link that says “Sign in with MU-entraID”

3. Login using your Muskingum email address and password. Follow any prompts for multi-factor authentication.

Connecting to MU-Resident Wifi

4. You will then be presented with your MU-Resident Wifi passcode and a QR code.

Keep this passcode. You will use this passcode, or the QR code, to connect your devices to the MU-Resident Wi-Fi

5. Once the passcode has been generated, the window can be closed. If you haven't scanned the QR on the page to auto-connect, pull up the list of available Wifi networks on your device and connect to the "MU-Resident" network. It will ask for the code you just generated in step 4. Enter it and click "connect".
- This process can be repeated for all your personal devices connecting to the network (phones, Laptops, Xboxes, Rokus, etc). Only the devices signed in with your code will be able to see each other on the Wifi network.
 - Your Wi-Fi code identifies you on the network. Please do not share it with anyone else. You can generate a new passcode by repeating steps 1-4. This will invalidate any previously generated codes.
